Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Advisory Action

Application No.	Applicant(s)	
10/820,462	D'ALBORE ET AL.	
Examiner	Art Unit	
Shane M. Thomas	2186	

Before the Filing of an Appeal Brief --The MAILING DATE of this communication appears on the cover sheet with the correspondence address --THE REPLY FILED 07 May 2007 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. 1. X The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods: a) The period for reply expires months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). **NOTICE OF APPEAL** 2. The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). **AMENDMENTS** 3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because (a) They raise new issues that would require further consideration and/or search (see NOTE below); (b) They raise the issue of new matter (see NOTE below); (c) They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or (d) They present additional claims without canceling a corresponding number of finally rejected claims. NOTE: _____. (See 37 CFR 1.116 and 41.33(a)). 4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324). 5. Applicant's reply has overcome the following rejection(s): 6. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s). 7. X For purposes of appeal, the proposed amendment(s): a) X will not be entered, or b) \(\subseteq \) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected: 1-33. Claim(s) withdrawn from consideration: _____. AFFIDAVIT OR OTHER EVIDENCE 8. The affidavit or other evidence filed after a final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e). 9. The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1). 10. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. REQUEST FOR RECONSIDERATION/OTHER 11. X The request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet. 12. Note the attached Information Disclosure Statement(s). (PTO/SB/08) Paper No(s). 13. Other: _____.

Continuation of 11. does NOT place the application in condition for allowance because: The prior art reference of Wong teaches amended claims 1,15, and 25, as the amendment claims have merely been modified by the limitations of previous claims 13,14,23,24, 32, and 33. Applicant argues that Wong does not teach the amended claims as the limitation of "the flag represents binary information associated to a subroutine that used a patching mechanism having a respective flag associated therewith" (page 11, 1 of the after-final response). Applicant stated that Wong, in contrast, compares an address provided by a processor with each break-out address to determine a breakout condition. (page 10, underlined portion of Wong). Applicant goes on to state advantages of the invention and the difference of Wong and the present invention as claimed. Nonetheless, the Examiner maintains that the Wong reference teaches the amended flag limitation as the --flag-- limitation may be broadly interpreted as a matching address required to breakout of the subroutine that is patched by the system of Wong. An address is essentially an arrangement of binary information (thus the flag, as interpreted by the Examiner, represents binary information) associated to a subroutine (the break-out address is associated with a subroutine since a portion of the subroutine that is replaced uses the break-out address to execute updated/repaired code instead of the previous code as discussed by Wong. The subroutine uses a patching mechanism which is defined by ROM instructions (patch code are stored as ROM instructions as shown in Wong, figure 6).

Further, each patching mechanism (e.g. set of patch instructions) has a respective flag (e.g. respective break-out address) associated therewith as shown in figure 8 (each set of patch code has a corresponding break-out address to which the patch code will be executed when the address to be executed matches the break-out address - see 45 of Wong.

Thus, it is apparent that Applicant has not limited the claims to clearly distinguish the present invention from the prior art teachings of Wong. Specifically, Applicant lists numerous elements of the present invention that distinguishes the invention over that of Wong. Specifically, Applicants mention that Wong maps to a portion of patch code to ROM space whereby the present invention does not require to perform the mapping (stated by the Applicant on page 11, 3, of the present response). However, such a limitation is not present in the invention as currently claimed.
